### AMENDMENTS TO THE CLAIMS

Please amend the claims as follows. Please cancel claims 7-12 and 14 without prejudice to the underlying subject matter. This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Previously Presented) An editing system comprising:

a timeline interface having at least one interactive track for interactive content and at least one track for time-based media, wherein interactive content may be associated with a point in time on the at least one track for interactive content; and

a user interface for receiving a user selection whether to place interactive content on the at least one interactive track at a single point in time with a locator object or at a point in time with a duration with a source clip object; and

means for allowing a user to place the interactive content on the at least one interactive track according to the user selection, wherein a locator object is an object that is attached to a source clip object in the timeline at a specified single point in time on the clip, and wherein a source clip object is an object that has a start position and a duration in the track.

2. (Previously Presented) The editing system of claim 1, further comprising:

a bin for storing interactive content;

means for importing interactive content into the bin such that interactive content is represented by an object in the bin, wherein the object is associated with a unique reference to the interactive content, and wherein information describing the interactive content is stored as an attribute of the object;

wherein the means for allowing a user to place interactive content on the at least one interactive track accesses objects representing the interactive content from the bin;

means for updating the information describing the interactive content stored as an attribute of the object in the bin by accessing the interactive content using the unique reference in response to the user invoking a refresh operation.

Attorney Docket No.: A2001006

3. (Original) The editing system of claim 2, wherein the interactive content is a trigger element and the unique reference includes a file name for a trigger file including a description of the trigger element and a unique identifier of the trigger element.

4. (Original) The editing system of claim 2, wherein the interactive content is a document and the unique reference includes a file name for the document.

5. (Previously Presented) The editing system of claim 1, further comprising: a bin for storing interactive content;

means for importing interactive content into the bin such that interactive content is represented by an object in the bin, wherein information describing the interactive content is stored as an attribute of the object;

wherein the means for allowing a user to place interactive content on the at least one interactive track stores information about the placement of the interactive content as an attribute of the object used to represent the interactive content.

6. (Previously Presented) The editing system of claim 1, wherein interactive content includes display information indicating information to be displayed in a display with the video from the at least one track for video, and a specification of size and spatial position of the video relative to the information to be displayed in the display, and the editing system further comprising:

means for playing back the program specified by the timeline interface including:

means for accessing the specification of the size and spatial position of the video for the interactive content corresponding to a point in time in the program; and

means for displaying the video and the display information of the interactive content according to the specification of the size and spatial position of the video relative to the information to be displayed in the display and the point in time in the display and the point in the

program.

7-12. Cancelled.

13. (Previously Presented) The editing system of claim 5, further comprising:  
means for allowing a user to edit placement of the interactive content on the at least one  
interactive track; and

means for updating the information about the placement of the interactive content stored  
as an attribute of the object in the bin in response to editing of the placement of the interactive  
content on the at least one interactive track.

14. Cancelled.
